navigate safely  
through....*

If you observe a lesson or a seminar you can see that some students are actively taking part others aren't.

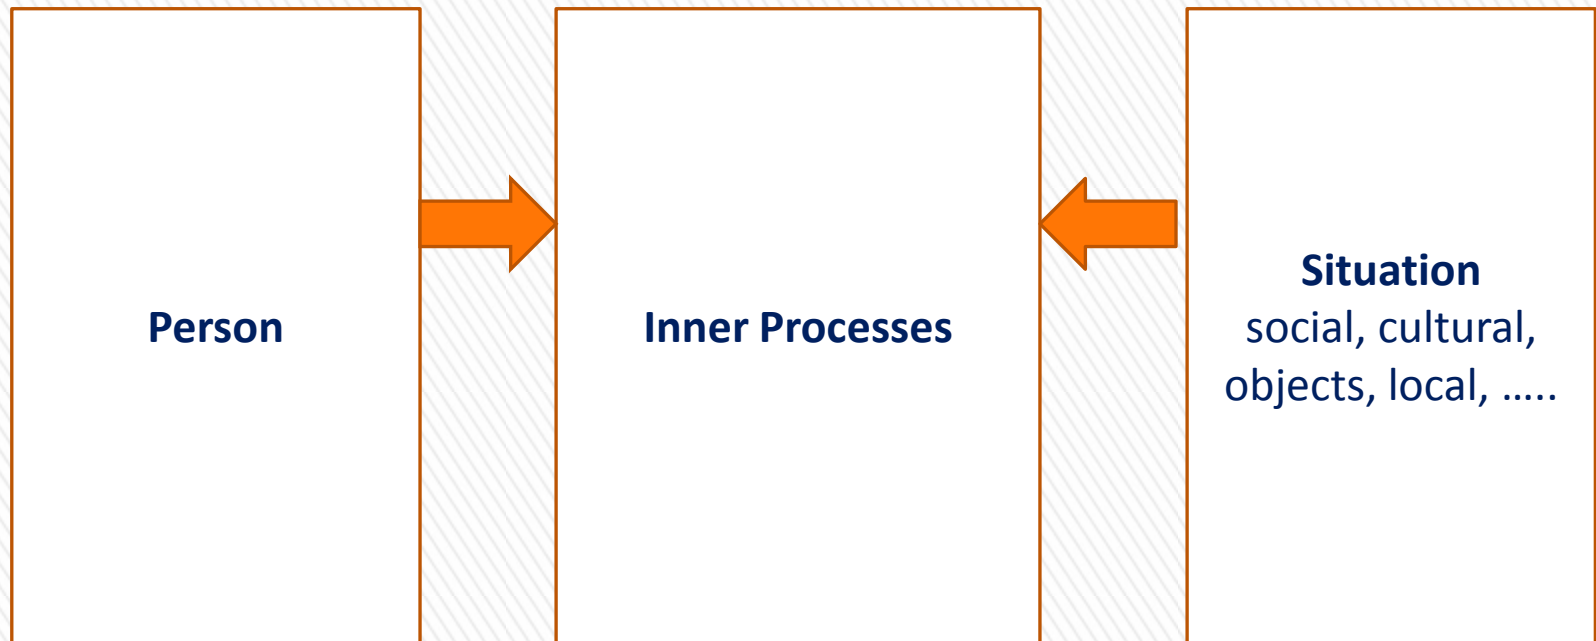

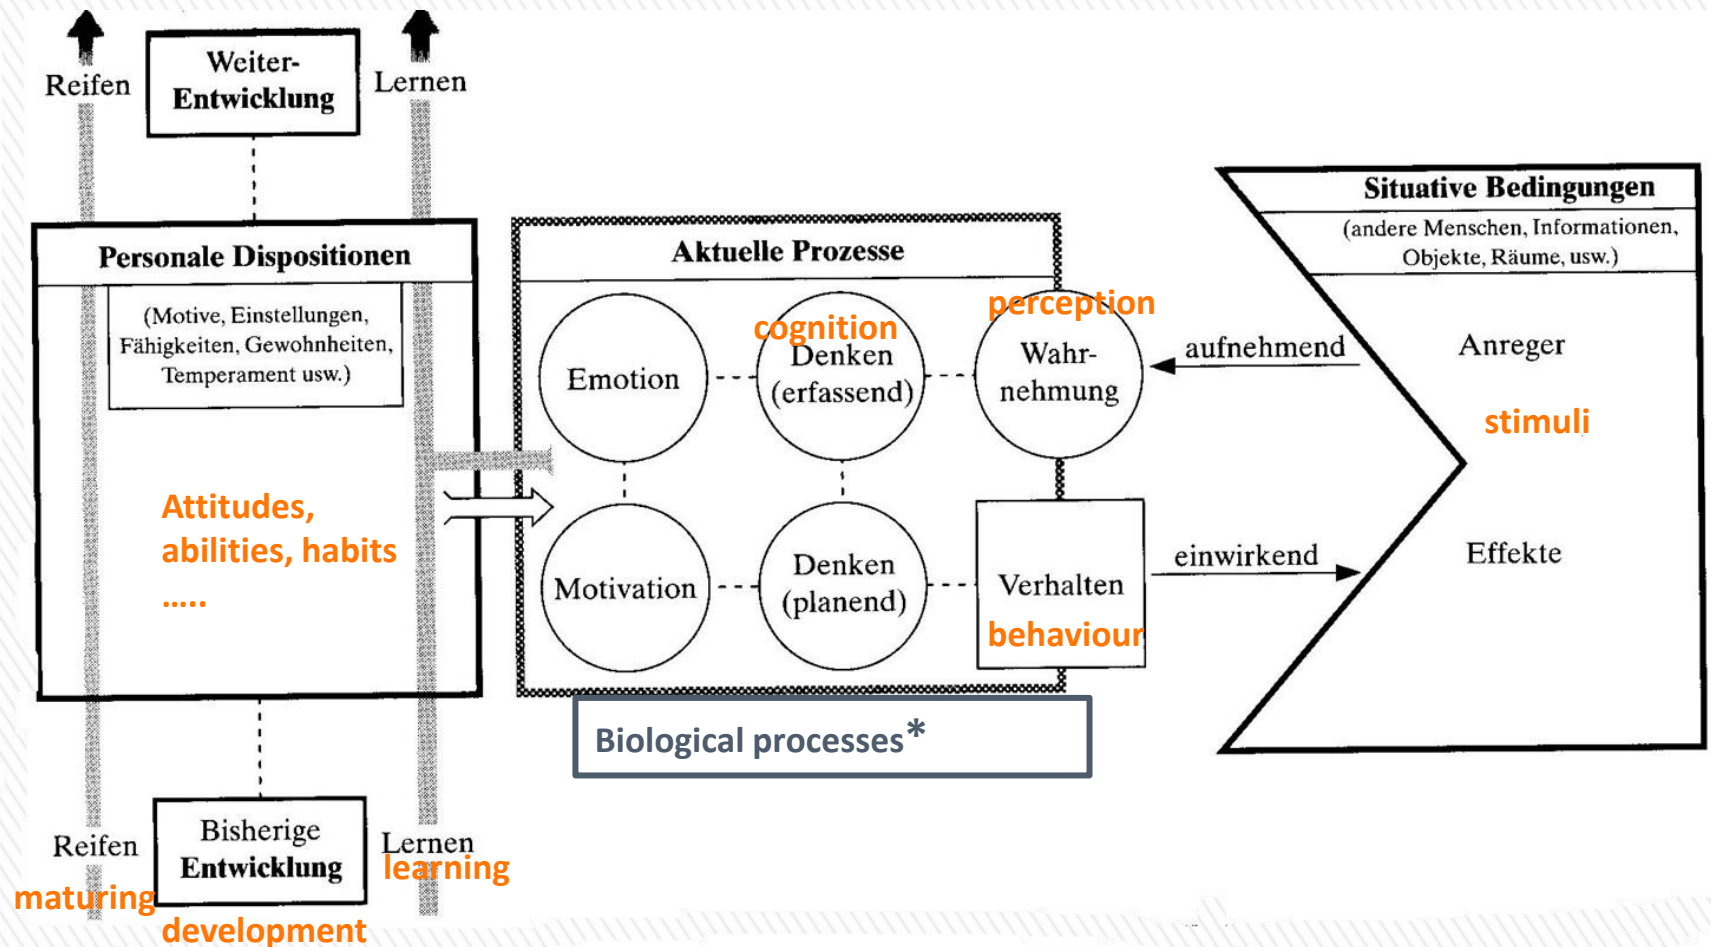

## ➔ What does students' attendance and activity depend on?

- a) Collect factors for yourself. 5'
- b) Get together in small groups and share your findings. 7'
- c) Try to find categories (not more than 4!) and class your findings to these categories. (Mind map?) 15'

Most students find more or less these main three categories:

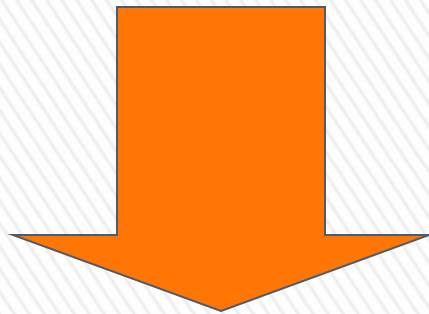

Tafel 27: Integrierendes Modell zu grundlegenden Aspekten des psychischen Systems

Model taken from: „Psychologie lernen“, H-P Nolting, P. Paulus, Beltz-Verlag, 1999 page 99.

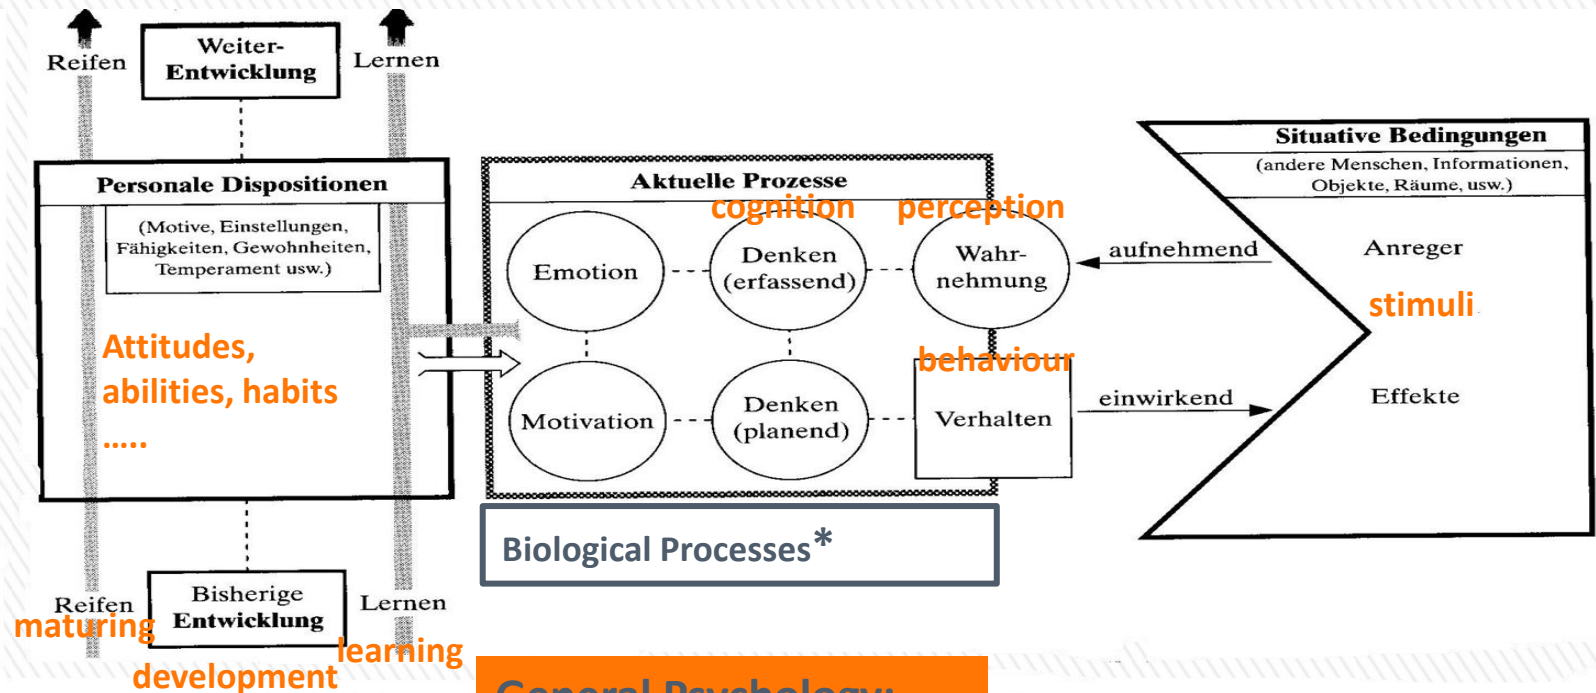

\* Addition by R.M. Schrempf 2009

For the many different aspects of this model  
psychology as a science investigates fundamental  
matters / processes / causal relations:

**Fundamental knowledge of academic  
psychology**
